**2101 Constitution Avenue
Washington 25, D. C.**

The Prevention of Deterioration Center operates with the support of the Army, Navy, and Air Force under contract between the National Academy of Sciences-National Research Council and the Office of Naval Research.

Consulting and advisory services are offered by the Center to U.S. military agencies and their contractors, and to other Federal Government organizations. A library of about 50,000 technical reports, journal articles, and patents on materiel deterioration and its prevention is maintained, and provides the basis for literature searches. Preparation of selected bibliographies on specific subjects in this field represents but one area of service the Center renders. Information regarding library loans, and other PDC services and publications will be furnished upon request.

SPRAYED METALLIC COATINGS FOR FERROUS METALS,

AN INTRODUCTORY BIBLIOGRAPHY

- A-581 U.S. Naval Engineering Experiment Station, Annapolis, Md. (D.R. Clark).
REPORT OF TEST OF METAL SPRAYED ATLAS LANOVA CRANKSHAFT. (Its Test
R-8626-C). July 1946.
- A-1032 U.S. Naval Air Material Center, Philadelphia, Pa. Aeronautical Materials
Laboratory (C.M. Dougherty).
THE INVESTIGATION OF SPOT-WELDING OF PLATED LOW CARBON STEELS. (Its
Report No. AML NAM 25789, Part II). October 1950.
- B-392 Australia. Council for Scientific and Industrial Research. Division
of Aeronautics (K.R. Hanna).
STRESS-CORROSION: A REVIEW OF THE LITERATURE. (Its Report SM. 120;
Australia. Scientific Liaison Office, Washington. Australian
Technical Papers. No. 1684). October 1940.
- B-463 Gt. Brit. Armament Research Dept. Applied Research Division.
HUMIDITY TESTS OF METALLIC COATINGS ON STEEL AND ALUMINUM. (Its
Metallurgical Report No. 2/48). February 1948.
- B-636 British Standards Institution, London.
SPRAYED METAL COATINGS: PART I. PROTECTION OF IRON AND STEEL AGAINST
ATMOSPHERIC CORROSION. (Its British Standard 2569:1955). 1955.
- B-637 British Standards Institution, London.
SPRAYED METAL COATINGS: PART 2. PROTECTION OF IRON AND STEEL BY ALUMINIUM
AGAINST CORROSION AT TEMPERATURES BETWEEN 120°C AND 950°C. (Its
British Standard 2569:1955). 1955.
